

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

III. *Some farther Observations relating to the Antiquities and Natural History of Ireland. In a Letter from the late Mr. Edw. Lhwyd, Keeper of the Ashmolean Museum in Oxford, to Dr. Tancred Robinson, F. R. S.*

Penfans, in Cornwall, Aug. 25. 1700.

Honoured Sir,

FOR Antiquities, *Ireland* affords no great variety; at least it was not our fortune to be much diverted that way. I have in divers Parts of the Kingdom picked up about 20 or 30 *Irish* Manuscripts on Parchment: But the Ignorance of their Criticks is such, that tho' I consulted the chiefest of them, as *O Flaberty* (Author of the *Ogygia*) and several others, they could scarce interpret one Page of all my Manuscripts; and this is occasioned by the want of a Dictionary, which it seems none of their Nation ever took the trouble to compose. I was informed (but how truly I know not) they have lately printed one at the *Irish* College in *Lovain*; which if I could procure, I should not despair of being in a short time able myself to understand these Manuscripts; tho' many of them being but insignificant Romances, it would scarce quit the Pains. What I most value amongst them are their old Laws, which might give some Light to the Curious as to many of their National Customs; and some of their old Poems: But all are of use to any that would compose a Dictionary of their Language; which was anciently (considering the narrowness of their Knowledge as to Arts and Sciences) doubtless very copious..

I saw no Coins found there, but the *Roman Gold Coin of Valentinian jun.* formerly mentioned ; several of our old *English* since the Conquest ; and one cast Brass Piece inscribed with *Runic Letters*, which I take to have been a *Danish Amulet*.

Several of our old *British Monuments*, called *Kaer, Karn, Cromlech, &c.* we met with ; and found that they distinguished them by the same Names.

What were peculiar to themselves, were their high round Towers for Belfreys ; their round Entrenchments, commonly called *Danes Rathes* ; and the Elf-Arrow Heads of Flint.

About *Slego and Bili Shany* we had good success as to Figur'd Stones ; where we met with variety of *Astrapodia* and *Astrorrhiza*, or *Modioli*, not yet figured or described, together with other Curiosities in that kind ; all which (together with the Manuscripts) I have long since sent to *Oxford*.

In the same Neighbourhood, on the Mountains of *Ben Bulbin* and *Ben Buishgen*, we met with a Number of the rare Mountain Plants of *England and Wales*, and three or four not yet discover'd in *Britain*. *Mr. Heaton's Chamædrys Alpina* is a common Plant on those Hills, as also on divers other Mountains and Heathy Grounds in *Connaught and Munster*.

In the Isle of *Aran* (near *Galloway*) we found great plenty of the *Adiantum verum*, and a sort of matted Campion with a white Flower, which I bewail the loss of ; for an imperfect Sprig of it was only brought me ; and I waited afterwards in Rain almost a whole Week for fair Weather, to have gone in quest of it.

In most of the Mountains of *Galloway and Mayo* grows an elegant sort of Heath, bearing large Thyme-leaves, a Spike of fair purple Flowers like some *Campanula*, and viscous Stalks. I know not whether it be any thing related to the *Cisti Ladaniifera*.

In the same Places *Pinguicula flore carneo-minore* is a common Plant, and a sort of *Ros Solis*, which I take to be undescribed.

Sedum serratum foliis pediculis oblongis insidentibus is exceeding common on all the Mountainous Tracts of Mayo, Galloway, and Keri.

On the Mountains of Keri, *Sanicula guttata* grows in abundance ; together with some other rare Plants, as the *Arbutus*. *Cotyledon hirsuta*. *Cirsium humile montanum* *Cynoglossi folio polyanthemum* R. Syn. *Alcbimilla Alpina pentaphyllos*. *Sanicula aizoides inter guttatam & Sedum serratum ambigens*. *Veronica procumbens maxima*, an N. D ? &c. But the Tories frustrated our Curiosity here, tho' no where else in the Kingdom.

Pentaphylloides fruticosa we found plentifully amongst Lime-Stone Rocks on the Banks of *Loch Crib* in the County of Calloway ; and Dr. Merret's *Vaccinia rubra foliis Myrtinis crispis* (a very beautiful Plant) we found to be no rarity in this Kingdom.

We have preserved of all these, and some more I have not time to mention ; as also of such Marine Plants as had not occur'd in *Wales*.

We met with some Marine Animals of the Exanguious kind, that were Strangers to us ; and have preserved by Figures and dried Paterns what we could.—— I am,

Honoured Sir,

Your Obedient humble Servant,

E. LHWYD.
